Course Description:

This class continues to explore developmental theories and maturation. It concentrates on the school years and adolescence. It approaches development through the psychoanalytic work of Heinz Hartmann, Peter Blos, Stanley Greenspan, Otto Kernberg, Harry Stack Sullivan, Heins Kohut, and others. Modern psychoanalysis considers the theoretical, clinical, and social/cultural contributions that impact patients' lives. Students are exposed to diverse topics to enhance their theoretical and clinical knowledge. Students are highly encouraged to engage in classes by sharing their thoughts, feelings, knowledge, and experiences. This class promotes and values respect, diversity, differences, and personal and professional growth.

Course Objectives (with corresponding ABAP Competencies Codes):

At the conclusion of this course the student will be able to:

- Understand human development from a psychoanalytical perspective (1d, 1e, 1f, 2a, 4.h)
- Understand maturation process from the nomothetic and idiographic perspectives. (1e, 1f, 2a)
- Identify and apply various maturation theories in clinical work (1c, 1g, 2e, 4f)
